Subject: Site Characterization and Cleanup Action for Polychlorinated Biphenyls at Building 529,  
Investigation Area H2, Mare Island, Vallejo, California

Dear Ms. Bisson:

Enclosed is the Site Characterization and Cleanup Action for Polychlorinated Biphenyls at Building 529 Summary Report. CH2M HILL prepared this document in compliance with the Consent Agreement/Final Order (CA/FO) between United States Environmental Protection Agency (USEPA) and the United States Department of the Navy, with the City of Vallejo and Lennar Mare Island (LMI) as intervenors. The CA/FO sets forth the polychlorinated biphenyl (PCB)-related requirements that must be met to satisfy the Toxic Substances Control Act (TSCA) for the Eastern Early Transfer Parcel (EETP) of Mare Island.

The objectives of the 2004 cleanup action were achieved. The PCB sites at Building 529 meet the criteria for no further action (NFA) under TSCA. Therefore, the purpose of this document is to obtain USEPA concurrence that an NFA determination is appropriate for Building 529 with respect to PCB contamination as part of the overall regulatory closure process for the EETP of Mare Island.

Please submit your approval of NFA for Building 529 to me at the above address or via e-mail at [jmorris1@ch2m.com](mailto:jmorris1@ch2m.com) by July 30, 2004. If you have any questions regarding Building 529, please contact Carla Duncan at 775/329-7238, extension 220.

Sincerely,

CH2M HILL

Jeffery C. Morris, PE
